-2-

category (a) a 100% work effort in a quarry for a four-man tean consists in the production of 12 cubic meters of building stones in an eight-hour work period, and its delivery to the loading point. For this work the pay is 57 rubles per month. Four men in category (b) are supposed to produce 75% of the work quota of a category (a) team. If the quota is exceeded oven by as little as 1%, an extra allowance of 200 grams of bread is issued for that day. Category (c) workers receive 17 rubles per month.

- 4. Officers, who do not work, have better food and living conditions.
- 5. The German-language newspaper, Freies Deutschland, and German books and pamphlets, all printed in Moscow, are occasionally distributed in the cumps. Political and economic talks are sometimes given by German civilians released from concentration camps, but are not well attended.

25X1 V₀

- 1. Camp 56-1 located outside of Robruisk, about 150 km southeast of Minsk (the capital of Byelorussian SSR), had accommodations for about 6,000 persons.
- 2. The prisoners were divided into work groups as follows:
 - a. & b. Both these groups worked twelve hours a day. Hen in these groups left camp at 5 a.m. for an hour's march to their place of work. They arrived back in camp at 7 p.m. Their duty was to cut wood, do construction work in Bobruisk, and dig peat. Craftsmen found employment at their trades in Bobruisk or in specially equipped workshops in camp.
 - o. OK groups ()had Kraft without strength) worked in two, four, or six hour shifts and were made up of mon who had been hospitalized and were not well enough to do a full day's work.
 - d. Prisoners who were unable to work were kept in the hospital.

25X1

- the warden did no manual labor and received double rations.

 The duty of the warden was to indoctrinate the prisoners in Communist ideology.

 Das Kapital by Karl Marx was the only Communist textbook available in Gorman.

 Other Communist literature was of the leaflet kind and of a crude nature.

 Camera slides dealing with life in Soviet cities and on Soviet farms before the war were frequently shown. There were also instructional diagrams of Soviet mass production of machinery. Then a barrack propaganda warden was considered politically sufficiently mature, he was promoted to an "activist" (active nember of the Party). The "activists" received special propaganda training prior to their release.
- 4. Representatives of the Eational-Komitee Freies Deutschland took charge of the barrack warden and of the "activists", and worked directly under and with the Russian camp commandant. These IEED representatives planned the indoctrination lectures and coached the "activists" along Communict Party lines. According to the informant, NKFD representatives were equipped with special passes and circulated freely in and out of camp.

		1987年 -
•		Approved For Release 2005/05/16 : CIA-RDP82-00457R000400700001-3
₩		CEPTRAL INTELLIGENCE OF DUP
25X1		60,000 inmates, about one-third were Russian political prisoners and two-thirds German Pris. Another describes it as Comp 68-1. a 77 complement of 4,500 perc employed digging foundations for new houses and factories.
25X1 25X1	2,	There are numerous industrial works in the Chelyabinsk area, including an automobile-tractor factory employing 25,000 to 30,000 workers, half Missian political prisoners. During 1945, in October, production of T-34 tanks continued at full speed. Inother department produced great numbers of trucks. Eaching thele work usually old and of American or English origin. Local civilian inhabituats called this factory and the lead mines not far from the city the "Russian Hermann Goering Works".
25X1		
		"Russian civilians were wondering why the war production was continuing after the end of the war.")
25X1	3,	ANTIFA propaganda was included in the Chelyabinsk program. Those who appears to have been converted to Communism were privileged in food, employment, and an earlier return to Germany. Most of this indoctrination took the form of lectures given by Germans who seemed to have been in Mussia for some years and had received intensive political training. The main topic was the desire bility of Communist aims for the workers of the entire world. The German-language newspaper Freios Deutschland was distributed. All of this
25X1		made no impression on the majority of PMs.
	4,	The ANTIFA School was reported to be located in a northeastern suburb of Moscow. The curriculum included political and military training. Etudents were both officers and enlisted men, nostly aged 25 to 45, who had proved themselves as Communists. Three German generals were runored to be attending the school.
25X1 25X1 25X1		officers and Mi were being politically re-educated".
25X1 25X1		ANTIFA-Company were ordered to attend the ANTIFA School. The teaching staff consisted of national committee members of Freies Deutschland in Russian uniforms and of German and English-speaking Russian officers. Schooling included lectures, training classes, and self-study, and was based on anti-Fascism and Marxism. The most promising pupils were qualified to take over administration posts. At the end of the lecture
		course, reports were made by members of the central connittee of the KPD. The other Allies were not supposed to gain knowledge of this school, although the achievements of the Allies were officially recognized and their capitalistic make-up deployed.")
	5.	Camp 53 at Alexino. (Alexin, south of Moscow?) 4,000 A/s were employed on earth works.
	6.	Karabowka. A convalescent camp for Wis, near Kazan.
	7.	Karagana. This camp apparently utilizes some prisoners for work in the coal mines. Informant worked 200 meters below ground. There was no elevator and techniques were primitive.
	8.	Kazan. A group of 17/18 arrived in Berlin on 23 November 1945. They had been released from a camp in Kazan on 14 October. There were long stops en route and five out of forty-five mon in one car died during the trip.

.

held 2,000 to 3,000 Germans, Italians, and Romanians who worked in a type-writer factory, a garage and automobile repair shop, and similar enterprises.

- 9. Kuschnitsa. PWs were ouployed on earth works at this camp, 500 kilometers south of Moscow.
- Mistiera. About 300 kilometers east of Moscow, this camp contained some 25,000 German PVs who manufactured bricks by hand.

25X1
25X1
25X1
Russians in supervisory and managerial positions.

12. Novosibirsk. The camp was about 250 kilometers east of Novosibirsk.

- 13. Comp near Orel. The camp itself is not definitely located. About 6,000 German PWs were interned with 3,000 Russian political prisoners, half of them women. Russians with sentences of one to three years of forced labor were employed with PVs in armament factories, mainly in an electrotechnical plant. Hours were 8:00 acm. to 5:00 pcm.
- 14. Orscha. A so-called "doath carp" where 2,000 iWs cut peat and were employed on earth works. Monthly distribution of Freies Doutschland was made and propaganda lectures were given.
- 15. Orsk. A camp in the Urals where PVs labored on earth works connected with the construction of new armment plants, said to have been begun in 1958. During the expansion, tanks continued to be produced.

25X1 🗜。

25X1 25X1 25X1

- The principal political activity in Camp 165, near Vyagniki, was carried
 on by "activists" PWs especially appointed after going through the
 A"TIFA school. They took part in informal discussions and even guided
 barracks bunk chatter along political lines.
- 2. An ANTIFA school occupied a separate area of the camp. It had two sessions in the spring end in the fall. Each was of three or four months duration, attended by 800 1,000 men at a time. Food at the school was better than in the rest of the camp and students, whose studies constituted full-time work, were freed from normal camp jobs except for one day per week. Sport was organized.
- 5. The school faculty consisted largely of refugees from the enemy countries who had fled to the USSR before the outbreak of war. Later, Ms who had studied in Noscow were also used as teachers.
- 4. To qualify for admission, a PW was required to have a good conduct record during his captivity, to have manifested a desire to work, and to have shown a strong interest in political affairs.
- 5. The school library was larger and better than the usual camp library, and newspapers and radio were available.
- 6. The ANTIFA school course covered the following subjects:

The development of Prussia
The teachings of Marx and Engels
Development of Marx' and Engels' teachings by Lenin and Stalin

	25X1	
SECRET		
	CONFIDENTIA	L

~5~

The Russian Revolution
Industry and agriculture in the USSR and the Five Year Plans
The causes and consequences of the First World War
The mistakes of the Weimar Republic
Divisions among the German working classes permitting the rise of the Masis
Origins of the Second World War
The true nature of the Nazis
The question of the war guilt of all Germans
German reparations
The reconstruction of Germany

- 7. At the conclusion of the course, both oral and written examinations were riven by examiners from Moscow. Those who did best were chosen to be activists and a few, warranted entirely healthy, were selected to go to Moscow for further training. The latter remained in Moscow for varying periods, up to about six months. Those with talent could got artistic training in the capital. Also, "there was a possibility of remaining in the USSR and eventually obtaining Soviet citizenship."
- 8. Informant was asked to remain (presumably as an activist) by the political instructor of Camp 165, but the camp physician would not permit his retention because of poor health. Not even the camp commander could override the doctor.
- 9. Officers had separate quarters and better food; but after the end of the war they were required to work like the EM prisoners, received no other special treatment, and had no privileges among the students at the SMTIFA school.

25X1 G.

1. Asbest

25X1

A number of factories in and around Asbest, which is said to have increased its population to 200,000, were making spare parts for cars, planes and tanks. Fils employed were segregated from Russian workers.

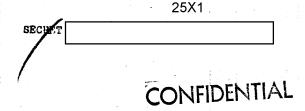

6,000 Fils captured near Posnan. On release, Fils were lectured by two political commissers who advised them to remain anti-Fascist and not to forget that the U.S. and British Zones of Germany were occupied by capitalists and imperialists.

2. Briansk

Comps in this area (total unknown) each housed approximately 2,000 PWs. Most immates worked nine hours daily in a coal mine; they were truined by Hungarian and Romanian PWs who afterwards were transferred. Shop stewards and supervisors were Russians who had worked in Germany during the war as volunteers and were now forced to do compulsory labor as punishment. The newspaper Freies Deutschland was distributed, and FD speakers discussed, among other topics, the rapid reconstruction work and ample food supplies available in the Russian Zone of Germany, comparing this with the insufficient rations and lack of reconstruction in the other zones.

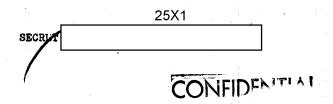

3. Jelez

Town population estimated to be 50,000; PW camp population, 5,000-8,000. PWs worked with Russian political prisoners in a factory making batteries for communications equipment. Maximum production was maintained after

21. Vologda, Camp 193-B. Located about 150 kilometers from Vologda. 1,000 ki! prisoners (October 1945).

CONFIDENTIAL

CUMURAL INTELLIGENCE GROUP

-8-

22. Riga Camp 2. 12,000 officer and enlisted PWs (November 1945). Two propagands lectures per week were given by German civilians who had been concentration camp immates. PWs were told they would be released immediately if they volunteered for two years in Russia as free workers.

25X1 I.

- The camp at Krasnogorsk (No. 26), about 30 kms southwest of Moscow, comprised three separate sub-camps, two of which hold 5,000 men each and the third 3,000 men. The latter is a "penal camp" and persons sent there are employed exclusively on felling trees under especially severe conditions.
- 2. Until recently there was another camp at Krasnogorsk, which was numbered 27, where Field-Marshal Paulus and General Schoemer had been staying. This camp has been transferred, together with its inhabitants, to an unknown destination.
- 5. Some of the prisoners from Camp No. 26 and No. 27 near Krasnogorsk were engaged on the erection of a large aviation factory near the town of Krasnogorsk.
- 4. The Freies Deutschland organization has been officially disbanded, but periodicals of this organization are still being issued in the same form and under the same titles. It appeared that the FVs did not know that the organization had been disbanded.
- 5. PWs regarded as Communists perform minor guard duties and are employed on work inside the camps. In addition, they have a little more personal freedom than the others.

25X1

•

Detwoen 500 and 600 German Pis were detained at this date at Camp 34 in or near Balshikha, 30-40 km. east of Moscow (directly on the Line 380 E).

- 2. The camp was clean and well organized. Food rations were adequate. Six former German officers were in charge, under a Soviet commissar.
- 3. An ANTIFA group was founded in September 1945 and six PWs were sent on to Moscow for further indoctrination in this line. In May 1946, a theater group was initiated among the prisoners and the camp was supplied with German books.
- 4. A weekly newspaper in German, Nachrichton fur Kriegsgefangene, contained news of Germany. Emphasis was laid on reconstruction, the resumption of industrial activity; and the good food situation in the Russian Zone was compared with starvation and the complete stalomate in the other zones. Repeated attacks were made on the SPD, especially Dr. Schumacher, and there were also accounts of the reactionary militarist stronghold existing in the western part of Germany.
- 5. No political instruction or speeches were given to PNs immediately before their departure.

25X1 K.

There are more than 6,000 prisoners of war in the Prisoner Camp No. 67 in Homel. As they are at some distance from their places of employment, they are temporarily accommodated in so-called "sub-camps" located near their place of work. They are, nevertheless, considered as belonging to the Camp No. 57.

	25X1
SECRET	
	CONFIDENTIAL

CENTRAL INTELLIGENCE GROUP

2. The camp contains only Germans and Austrians. The latter were promised as early as autumn of 1945 that they would be releases, but nothing has, so far, been done to carry out these promises.

- 3. In 1946 the two nationalities were separated, and each was allowed to publish its own camp news-sheets. Bational antagonism is, thus, being fostered by the Russians and subsequently exploited for their own ends. In order to extract better work from the PWs, the food ration was increased last March.
- 4. Prisoners of war work officially eight hours per day, but the Soviets demand a "further voluntary" contribution of two hours' labor daily. Soviet propaganda organs then advertize this as the workers' demonstration of democratic co-operation against Pascism. Prisoners have been promised additional pay for this extra labor but, so far, this promise has not been fulfilled.
- 5. The Soviets, to show good-will, occasionally send home a prisoner sho, during indoctrination, has manifested a "suitable democratic attitude".
- 8. The Russians are said to have a most definite purpose for infiltrating the British and American Zones of Occupation in Termany with woll-trained and tested Communist elements. These people are extremely well-trained and are provided with detailed tasks, which include the fostering of unrest, chaos, and dissatisfaction with a view to Communizing the Reich. Fork is in hand also to bring about the Communizing of other countries, such as Hungary and Romania. The most unsatisfactory results, so far, in this work have been obtained by the Russians in Italy. As they lack Italian nationals who are likely to prove entirely reliable agents for their campaign, the Russians have trained Germans, originating from among the Terman minorities in Northern Italy (as well as in other countries) who are well-acquainted with the local language and conditions.
- 7. It should be noted that the "new democrats" thus dispatched are provided with "original" and water-tight "authentic" documents in perfect order.

	15.	Although some Pris here were employed in the tank factory, others loaded coal or built bridges and roads. Those who exceeded their work quotas were paid up to 200 rubles, with which it was possible to buy U.S. canned milk (60 rubles) on the black market. Out-going nail was dispatched every three months, but only working Pris were allowed to write letters or cards.
25X1 4.		
	1.	During May 1946, Soviet agents with officer's rank twice visited Communist Party Headquarters at Freiburgeim-Breisgau to recruit for service in Russis former Wehrmacht officers, Hitler Youth leaders, and students barred from the universities for Nazi activities.
	2.	Contact having been established by the local Communists, the Soviet agents invited the volunteers to go to Russia (via Berlin) for two or three years of "advanced study". Upon being questioned, they explained that the volunteers would be employed in training German IVs for police duties in Russian-occupied Europe, Although officially entitled "Reconstruction Groups", these new formations would be strictly military and would be largely staffed by "Freies Deutschland" officers, in particular, Generals von Paulus and von Seydlitz.
	3.	After two or three years service with these units, the volunteers would be free either to take up a commission in the new German Police Corps or to continue their studies at one of the universities in the Russian Zone of Germany.
25X1	4.	This Russian offer has been widely discussed in both Communist and Kazi circles in Freiburg.
25X1 25X1		
N.		
25X1 25X1	1.	While the numerous prisoners of war in the Stalingrad area are employed in reconstruction work, none are employed in the two tank factories - "Red Banner" and "Red October" - located in the area. The latter factory is reported to be producing armored plates for tanks. Comment: A current report Comment: A
	2.	Three thousand Pis in a camp near Scherebinsk (possibly Chelyabinsk) are reported to be working in a plant presumably producing rifle parts.
	3.	Prisoners in the camps near Insterburg, in East Prussia, are employed to change the railroad tracks to the Russian gauge and to load machinery, including agricultural implements, for shipment to Russia. These PVs are reported to be undernourished and performing only a fraction of their normal
25X1 ₀ 。		capacity because of failing strength.
	1.	There is a German corps in the Russian Irmy, though not directly at the front, but acting as a police corps or in other auxiliary tasks. This corps is composed chiefly of the German VIth Army men (the Paulus Army that surrendered at Stalingrad) and includes also others that surrendered later. The German soldiers are under German officers.
	2.	The prisoners who surrender now to the Russians are divided into two categories a. The Gestapo men: these are kept in special camps and have no contact

SMA intends to send 28,000 former PM's into the western zones in the near future to carry on political propaganda work. These men have been aspecially trained for this work. Some will be sent as PM's returning home and others as refugees from the east. The SMA authorities are reported to have said that the big Russian propaganda offensive in Germany is just ready to begin.

prisoners were driven to the University of Moscow in closed trucks, where school was held in the auditoriums. Courses were taught by twelve MVD commissars, former German Jews, who spoke in accent-free German. They were uniforms with green lapel insignia. The name of the leader of the Anti-Fascist school was Fassilov, who lectured two times per week on private and state capitalism. Cther teachers were: Karochilov, who lectured once each week on free worker's conditions; Dimitrov, who lectured on the difference between Nazism and Bolshevism; Yessola, who taught a course on ground reforms; Classov, who lectured on the difference between a coalition government and the one party system. In addition to these main political professors, there were less important ones who taught general subjects. During the week, there were special reading hours, at which time discussions on Lenin, Marx, etc., were lod by Russian officers. Once during the course, the femous German author, Dr. Friedrich Wolff, who resides in Berlin, visited the political school in Moscow and there lectured the students on why he became a Communist and why he believes in Communism.

	4.	the course lasted six months
25X	1	There were no final tests, but marks were taken during the weekly discussions and compositions were written by the students. The group with the highest
25X 25X1		grades was immediately released and was permitted to go home after being
25X1		requested by the Russians to act as political agents for Communism. The middle group of students was sent to the French Zone of Germany to work in
25X1		the coal mines. the Russians and the French had an
20/(1		agreement whereby German PW's from Russia were sent as slave labor to work in mines in the French Zone of Germany. The group of students with the
25X1 25X1		lowest marks was officially sent to Leningrad, although what occurred to them there is not known.
	5.	The Commander of the lager "MOSCOW No. 2" was Peter Yarochiloly, a Russian
25X1	•	colonel with the usual red and gold shoulder straps. The Camp "Moscow No. 2" was guarded by soldiers of the
25X1		Seydlitz group, members of the "Committee for Free Germany".
EE.		
25X1	1.	"Moscow No. 2" camp for German PW's is located to the southeast of Moscow and is within visible distance of the city. During the period
25X1		the Commander of "Moscow No. 2"
20/(1		was Peter Yarochilolv, a Russian colonel. The lager was guarded by soldiers of the Seydlitz group — members of the "Committee for Free Germany". The
		chief of this group is still Ceneral Soydlitz. The group presently contains
		approximately 120,000 men, most of whom were taken prisoners at Stalingrad. The whole Scydlitz group lives in a special city near "oscow named"
		Voroshilovgrad. Members of the group wear Russian officers' uniforms with
		special patches. The members of the group obtain the regular rations of Russian officers and also their monetary allowance. They have a completely
٠		free life and their only two duties are to guard the comp "Moscow No. 2"
		and to put agents into the Pi enclosure. The Soviet Army treats the Seydlitz group as brothers. Many members of the group have learned to
		speak Russian fluently and have had maximum political training. General von Paulus, a member of the Seydlitz Croup, visits the camp often.
25X1	2.	
		from rioting camp inmates. There was much fighting going on between the Scydlitz group and the camp inmates. The GPU (sic) soldiers aided the
		Seydlitz Croup. A prominent personality in the camp was Heinz Kaammerer,
		former address Duesseldorf. His rank in the German Army was that of lieutenant colonel, and the Russians gave him a rank of full colonel.
	3.	In January 1946, approximately ten German officers, with whom the school
		training had been a great success, were released from the camp. These officers were given a trunkful of clothes, a very large amount of money,
		and were ordered into all four zones of Germany to act as political agents for Communist parties in the coming elections. Those officers were from
		19 to 21 years of age and, since they had seen very little of life, were
25X1		that the Communist theory was wonderful and was the only one possible but
		that, when Russian people were seen, the poor living conditions and general
25X1		lack of many necessities to which Germans were accustomed as a matter of course caused considerable disillusionment.
FF.		
FF.		
		Return of 120,000 Cerman Prisoners of War from Ruspia
		The following information is derived from a report made
		in the Department of Health in the Russian Central Adminis- tration on 16 July 1946 for the departmental members in
		charge of returning prisoners of war. The report was made in connection with the announcement that Russ's was going
		to allow 120,000 prisoners of war to return to their homes
		between 20 July and 15 October, 1946.
		25¥1

- Daily arrivals beginning on 20 July will total 1,500 men until the total 120,000 has been achieved. These are Cerman prisoners of war who are unfit for work and therefore of no use to the Soviet Union. Sixty thousand men are expected to need permanent hospitalization upon arrival, among them a large number of mentally deranged.
- 2. These returness will be taken first to the Horn-Darracks in Frankfurt/Oder. From there they will be sent to the quarantine camp, Kronenfelde, in Frankfurt/Oder. The Chief of the Division of Medicine, Dr. Bermann, pointed out that this was not a hygienic quarantine camp but a last political orientation center before the prisoners are released. The political training here is given by German Communists, not Russians, and the entire camp is administored by Germans. From this quarantine camp, the men are to be sent to infirmaries and hospitals or released for return to their homes.

- Of the 50,000 PW's scheduled to arrive in Germany from the USSR between 15 July and 15 August, 15,000 had been returned by 13 August. Approximately ten percent require medical treatment. The intellectual level is said to 25X1 be lower than average. none of these 25X1 men received any political training during captivity. There are about 25X1 seven officers per 1000 men among the returneos. Many of the officers are from the medical corps and none of them held a rank higher than lieutenant.
 - Most of the returnees were gradually moved eastward during their captivity until they reached mining camps in the Urals. Mortality rates were highest in these mining camps.

25X1

25X1 25X1_€

the PW's there are used in the construction of new cities. In his camp there were 5,000 youths, 14-17 years old, from the Province of Brandenburg. The death rate was high because of hard work and insufficient rations.

25X1 there are 4,000 youths missing from the former "Sudetengau".

25X1 HH.

- A Soviet officer of the Repatriation Mission in Paris stated, under the influence of alcohol, that the former army of Generals von Paulus and von Seydlitz, formed in the USS! in the beginning of 1943 and numbering
 - In the course of a leave spent at Kuibyshev in April 1946, this Soviet officer met many officers of this army who were of Baltic origin and who wore Soviet uniforms. Most of the contingents were in the Totskoe camp and in certain other camps which had sheltered Poles of the Anders Army. According to these officers, the Seydlitz Army now numbers 100,000 men, since many of the members have already been sont by small boats to Germany, where they serve in various civil and semi-military capacities in the Russian Zone (polico, etc.).

140,000 effectives at the beginning of 1945, has not been dissolved.

3. The German contingents in the USSR are very well troated but they complain of the very severe restrictions on their correspondence with Germany. They are authorized on rare occasions to send home a printed card, which they can only sign and which states only that they are in good health, well nourished, and well treated.
